

SELENIA GOLD SYNTH Cod. 1201

DESCRIPTION

A synthetic based engine oil for normally aspirated, turbocharged and multivalve petrol or diesel engines. The special formula guarantees improved cold starting, reduced fuel consumption and excellent engine protection.
[sold only in EXPORT markets]

CHARACTERISTICS

Selenia Gold is a high quality lubricant, which guarantees the highest protection and performances of all engines. Its formula, tested to satisfy the needs of the latest types of engines, presents high technical features:

- engine protection to cold starting and in extreme weather conditions
- stability at high temperatures, thanks to the fluidity of the protection film, resistant also to extreme operating conditions
- anti-wear protection
- fuel economy efficiency

Selenia Gold can be used both for petrol and diesel engines of any make and power rating, ideal to satisfy the quality requirements of major car-makers.

ADVICE ON USE

Use according to manufacturer's instructions.
